

Bugfree Project Task Progress Bar

Instant visibility for every project: a progress bar on Kanban cards and a PercentPie Tasks smart button.

Project teams lose time opening projects just to understand “how far along we are”. This module adds a clean, lightweight visual progress indicator to the Project app so you can spot risk and progress at a glance.

Key benefits

- 1 See progress directly on each Project Kanban card (percentage + done/total).
- 1 Keep the standard Tasks smart button click behavior (opens the project tasks).
- 1 PercentPie indicator inside the Tasks smart button with Open/Total counter and tooltip.
- 1 No external dependencies; minimal and safe view inheritance.
- 1 Works well for PMO, agencies, internal IT and any team tracking delivery.

Features

- 1 Kanban progress bar rendered inside the Project card (uses computed fields).
- 1 Tasks smart button upgraded with Odoo's built-in percentpie widget.
- 1 Open/Total counter displayed below the pie (space-optimized layout).
- 1 Tooltip on the smart button: Tarefas (or your translated label).
- 1 Backend assets only; no website impact.

How it works

- 1 Install the module and upgrade it after updates.
- 2 Open Project → Kanban view: each card shows a progress bar.
- 3 Open a project form: the Tasks smart button shows a PercentPie with Open/Total.

Compatibility

- 1 Odoo 12 Community/Enterprise (Project app required).
- 1 Tested with standard project views; does not replace core actions.

Postinstall / upgrade checklist

- 1 Restart the Odoo service after install/upgrade.
- 1 Clear browser cache and asset bundles; if using CDN/Cloudflare, purge cached assets.
- 1 Developer mode tip: append ?debug=assets to force asset reload.

Support

Support by Bugfree do Brasil. Custom adjustments (labels, layout, extra KPIs) can be delivered as a PRO service if needed.
